Day 3 :

Practice Work

Everyday

① output

Day 3.png

② Notes

1) Day 3.pdf

③ Practice work

* Example

Suppose there are 3 variables a, b and task

If variable "task" is "plus" then add the two variables. (a, b)

If variable "task" is "minus" then subtract the two variables. (a, b)

If variable "task" is "mul" then

multiply the two variables. (a, b)

If variable "task" is "divide" then the two variables. (a, b)

(a, b, "your_task")

is hard coded in session work

"Your task for Practice work is to get the inputs from user on terminal."
